

# Search Tips for Searching the Official Debates of Rajya Sabha

RS debate has been developed using open source software “DSpace”. It has deployed SOLR search engine through which one can browse, perform simple search and filter search.

## 1. SIMPLE SEARCH

One can type any single word or group of words or phrases which are searched as free text word(s) in metadata as well in full text debates. It may locate those debates wherever these words or phrases may occur in the metadata and full text debates. As a default, SOLR search engine uses ‘OR’ Boolean operator, that is, search results contain either of the terms. For Example:

### A. Case 1: Search on **Water Policy** as keywords

It shows debates containing **Water OR Policy** as search term.

Rajya Sabha Official Debates >

### Search Result

Enter some text to search: Rajya Sabha Official Debates WATER POLICY Go

## 6. SEARCH WITH FILTERS

SOLR search engine search provides facility to apply search filters to limit the search results to specific fielded search criteria.

Filter search has three components such as **Field Name, Filter Operators and Field Value.**

**Field Name:** It is the metadata fields such as Title, Debate type, Members Participated etc. which can be selected from combo box.

**Filter Operators:** It provides various search filter operators such as “Contains” “Not Contains” “Equals” “Not Equals” which can be selected from combo box.

**Field Value:** Users has to type value for the field name. It also provides auto completion facility.

**For Example:**

A. Search on “Zoological Survey of India” has been performed as a free text search.

Rajya Sabha Official Debates >
