Stopping of Finance of US Exports to India

2776. SHRI KRISHNA KUMAR BIRLA: Will the Minister of COMMERCE be pleased to state:

(a) whether the Export-Import Bank of the USA has recently, announced ceasing of new approvals for financing US exports of India;

(b) if so, the reaction of Government on such decision taken by Export-Import Bank;

(c) the total losses in foreign exchange which Government may suffer due to such a decision, and

(d) the alternative steps Government propose to take in this regard?

THE MINISTER OF COMMERCE (SHRI RAMA KRISHNA HEGDE):

(a) Yes, Sir.

(b) and (c): The extent of the effect is currently unclear. However, according to the US Exim Bank press release exports to India of about \$500 million in pending transactions would get affected immediately. The extent of adverse effect will also depend on the extent to which the private parties of USA and India are able to mobilise alternative sources of financing. The ceasing of new approvals by US Exim Bank is also likely to adversely affect the business interest of USA.
