

(DR. S. VENUGOPALACHARI): (a) and (b) Structuring of power projects based on certain types of fuels, especially liquid hydrocarbons and gas has sometimes posed problems, due to constraints in their indigenous availability. Government of India closely monitors the infrastructure facilities such as transport arrangements & port facilities and fuel requirement of all the private power projects and endeavours to make infrastructure and fuel available.

Power potentials in the Himalayan Belt and the North-eastern Region

2966. PROF. RAM KAPSE: Will the PRIME MINISTER be pleased to state:

(a) whether it is a fact that immense potential are available in the Himalayan belt and in the North-eastern Region, which are sufficient to meet the power requirement of the country; and

(b) if so, the steps taken/proposed to be taken to exploit these resources?

THE MINISTER OF STATE IN THE MINISTRY OF POWER AND MINISTER OF STATE IN THE MINISTRY OF NON-CONVENTIONAL ENERGY SOURCES (DR. S. VENUGOPALACHARI): (a) and (b) As per the reassessment studies carried out by Central Electricity Authority in 1987 the total hydro electrical potential of Himalayan region and North-eastern region is about 64,500 MW (at 60 per cent load factor) which is about 76 per cent of the assessed potential of the country. Out of this, 4178 MW (at 60% load factor) i.e. 6.5 per cent of the assessed potential has been developed and 2742 MW (at 60% load factor) i.e. 4.25 per cent of the assessed potential is under development.

Amongst the measures taken by the Government towards harnessing the hydro potential are, creation of central/ joint sector corporations, increase in outlay for development of hydro projects, increase in budgetary allocation for central/joint sector projects and arranging funds for hydel projects through external assistance. Besides the Government has modified the financial, administrative and legal procedures to attract private investment.
