Findings of Indian Institute of Petroleum

1133. SHRI PARMESHWAR KUMAR AGARWALLA: Will the Minister of PETROLEUM AND NATURAL GAS be pleased to state:

(a) whether Government's attention has been drawn to the findings of Indian Institute of Petroleum in which a head way was made in experimenting the alcohol as an alternative source of fuel for vehicles;

(b) if so, the steps being taken to explore their use and step up production in view of the growing demand for petroleum products and its declining deposits;

(c) whether Government propose to make large scale commercial production and use of alcohol as fuel; and

(d) if so, by when?

THE MINISTER OF STATE OF THE MINISTRY OF PETROLEUM AND NATURAL GAS (CAPT. SATISH SHARMA): (a) to (d) Yes, Sir. It has been established that upto 3% of methanol and 5% of ethanol can be blended with petrol and used in vehicles without any modification of the carburettor. Similarly ethanol or methanol can be used as a dual-fuel with diesel by using additional equipment such as fuel tanks, pumps etc., which could be retrofitted to the existing vehicles. While several tests and trials have been conducted and some are continuing, the commercial use of alcohol {methanol/ethanol} as automotive fuel will depend on the sustained availability of surplus alcohol and techno-economic viability.
