

velop indigenous capability to launch Indian National Satellite-2 (INSAT-2) class satellites was approved in November 1990. During the last 18 months substantial progress has been made. All the design parameters of GSLV have been finalised and reviewed both at sub-system and system level. Models of the rocket are under detailed wind tunnel tests and procurement of long lead items has been initiated. Design and fabrication of facilities required for GSLV are also underway.

(c) India has already established capability to launch 50 kg class scientific satellites into low earth orbit, through the launch of Satellite Launch Vehicle-3 (SLV-3) during 1979-83. The first developmental launch of Polar Satellite Launch Vehicle (PSLV) carrying Indian Remote Sensing Satellite-1E (IRS-1E) is scheduled in the second half of 1992 and that of GSLV carrying INSAT 2 class satellite during 1995-96.
