CALLING ATTENTION TO A MATTER OF URGENT PUBLIC IMPORTANCE—

Crisis facing the Jute and Textile Industries in the country and Action Taken by Government in this regard

SHRI SANTOSH BAGRODIA (Rajasthan) : Sir, I beg to call the attention of the Minister of Textiles to the crisis facing the jute and textile industries in the country and the action taken by Government in this regard.

THE MINISTER OF TEXTILES AND THE MINISTER OF HEALTH AND FAMILY WELFARE (SHRI RAM NIWAS MIRDHA): Sir, the Hon'ble Members of the House have drawn our attention to the crisis facing the jute and textile industries in the country.

One of the basic yardsticks for evaluating the general health of the textile sector is the trends in the production figures of yarn and cloth. The total production of yarn in the country increased from 1382 million kgs. in 1984-85 to 1555 million kgs in 1987-88. Similarly, the production of cloth rose from a level of 12014 million meters in 1984-85 to a level of 12992 million meters in 1987-88. It will thus be evident that the production of yarn and cloth have been steadily increasing.

On the price front, while the general index of wholesale prices registered an increase of around 24% between May 1985 and February 1989, the index number of textile prices increased by 18% only over the same period. It is evident, therefore, that the prices of cloth have been contained within reasonable levels and, therefore, the main objective of Government policy of providing adequate amounts of cloth at reasonable prices to meet the needs of a growing population have been largely achieved.

An important parameter for evaluating the performance of the textile sector is the generation of employment. While the level of employment in the mill sector marginally declined from a level of 12.53 lakhs in 1986 to an estimated 11.81 lakhs in 1988, this was more than made-up by the increase in employment in the decentralised sectors. It is estimated that the level of employment in the handloom sector increased from 72.76 lakhs in 1986 to 84.22 lakhs in 1988. Similarly, the employment in the powerloom sector has increased from a level of 31.9 lakhs in 1986 to 55.95 lakhs in 1988. The overall position indicates that the total employment in the textile sector has gone up by more than 25% during the last three years.

The performance of the textile sector on the export front has been extremely satisfactory. The total exports of textiles, excluding coir and jute, were of the orders of Rs. 3785 crores in 1987-88 as
