6. Other measures include.
- Improving agricultural and horticulture produce.
  - Improving the purchasing power of the people through various income generating schemes.

#### **Malnourished women**

3341. SHRIMATI MOHSINA KIDWAI: Will the Minister of WOMEN AND CHILD DEVELOPMENT be pleased to state:

(a) whether it is a fact that amongst India's hungry people, the number of women is very high;

(b) if so, whether Government have any data about malnourished women;

(c) the details of programmes Government runs for the poor working women, who are mostly victims of malnourishment and don't get proper diet and care during pregnancy; and

(d) how Government plans to tackle the problem of homeless ill-fed children and women in the country?

THE MINISTER OF STATE OF THE MINISTRY OF WOMEN AND CHILD DEVELOPMENT (SHRIMATI KRISHNA TIRATH): (a) and (b) Nutrition status in adults is estimated by the Body Mass Index (BMI) which is based on height and weight measurements.

As per National Family Health Survey (NFHS-3), 35.6% of women (between 15-49 years) have BMI below 18.5 indicating chronic energy deficiency. State-wise prevalence is at Statement-I (See below).

(c) and (d) The Ministry of Women and Child Development is addressing the problem of undernutrition in children below six years and pregnant and lactating mothers through the Integrated Child Development Services (ICDS) Scheme in all States/UTs. The ICDS provides a package of six services namely supplementary nutrition, immunization, health check-up referral

services, pre-school non-formal education and nutrition and health education. Three of the services are provided through Ministry of Health and Family Welfare.

To bridge the gap in Recommended Dietary Allowances (RDA) and the actual intake, the nutritional norms to be provided through Supplementary Nutrition Programme (SNP) ICDS have been revised. Now 600 Kcal and 18-20g of protein are provided through supplementary nutrition to pregnant and lactating women.

To prevent anemia, iron and folic acid supplementation is also provided to pregnant and lactating women under RCH programme of Ministry of Health and Family Welfare.

Besides the ICDS programme, Government is implementing a number of schemes throughout the country, which directly or indirectly improve the nutritional status of women and children. A list of schemes being implemented by various Ministries is at Statement-II (See below).

In addition, Ministry of Women and Child Development is implementing various women empowerment schemes like Swadhar, Swayamsidha, STEP etc. which have components for skill upgradation, training for self employment and stay in Shelter Homes etc. leading to economic empowerment of poor and destitute women. This will result in increase in their purchasing power and consequent reduction of malnutrition in the long run.

The Ministry of Women and Child Development is also implementing various child welfare and protection schemes to take adequate care of street children. The National Commission for Protection of Child Rights (NCPCR) set up in 2007 looks into the matters relating to children in distress, marginalized and disadvantaged children without family and children of prisoners and recommends appropriate remedial measures. A Child Helpline is also in operation to take care of complaints from children.
