The allocation of power from Central Generating Stations to the beneficiary States/UTs is made in two parts, firm and unallocated. The firm allocation to the beneficiaries generally remains unchanged, unless power is surrendered by any beneficiary or the beneficiary is not able to clear the requisite dues to the concerned Central Power Sector Undertakings. The unallocated power in Central Generating Stations available at the disposal of the Government is provided on a dynamic basis to meet the seasonal and emergent needs of States/UTs keeping in view the emergent or seasonal nature of the request, the relative power supply position, utilization of existing generation resources, performance and payment capacity
