Economic recession

†3389. SHRI SHIVANAND TIWARI:

SHRI RAJ MOHINDER SINGH MAJITHA:

Will the Minister of FINANCE be pleased to state:

(a) whether it is a fact that Government holds the economic policy of developed countries alongwith big international financial institutions responsible for the present economic recession; and

(b) if so, the response of Government in this regard?

THE MINISTER OF STATE IN THE MINISTRY OF FINANCE (SHRI NAMO NARAIN MEENA):

(a) and (b) The origin of global financial crisis lay in structured investment instruments created out of subprime mortgage lending in United States of America. The securitization process, however, was not backed by due diligence and led to large-scale default. The complexity of the instruments, the role of credit rating agencies and lax regulatory structure played a contributory role. The high ratings assigned to certain tranches of structured instruments, which were quickly reversed with the onset of the crisis, created a panic situation among investors and precipitated the crisis. Following the collapse of Lehman Brothers in mid September 2008, there was a full-blown financial meltdown, which severely affected the financial and real sectors of the developed and developing countries.
