Melting of Glaciers

3584. SHRI SHYAMAL CHAKRABORTY: Will the Minister of SCIENCE AND TECHNOLOGY be pleased to state:

- (a) whether the glaciers in India are melting due to the global warming;
- (b) whether this phenomenon has affected the Ganges and its other tributaries; and
- (c) if so, the preventive measures taken in this regard?

THE MINISTER OF STATE OF THE MINISTRY OF SCIENCE AND TECHNOLOGY (SHRI PRITHVIRAJ CHAVAN): (a) The world is experiencing a phase of inter-glacial period since 10,000 years, during which melting of glaciers and its eventual recession, with minor fluctuations in between, is a natural phenomenon. This holds true for glaciers in India also.

- (b) Out of the total catchment area of 10, 16, 124 $\rm Km^2$ of Ganges, only 19,700 $\rm Km^2$ lie under the influence of glaciated terrain i.e. upto Deo Prayag. At Doe Prayag, reports indicate only 28.7% of flow is contributed by the glacier melt, while the contributions from base flow and rainfall is estimated at 71.3%. As only 5% of utilizable water comes from the glacier melt, shrinking of glaciers, if any, is not expected to impact the per capita availability of water significantly.
- (c) The Government of India, has constituted the Prime Minister's Council on Climate Change to coordinate action for a national strategy in the context of global climate change. A 'National Action Plan on Climate Change' (NAPCC) has been evolved to enable the country adapt to climate change
