

for increased milk production is being enlarged through milk producers cooperative societies. The economic status of rural poor in the dairy cooperatives is improved by a regular payment of remunerative prices round the year, providing market for rurally produced milk and economically priced inputs for increasing milk production.

As a result of implementation of Operation Flood I & II along with other milk production enhancement programmes taken up under Central, Centrally Sponsored and other State Sector Schemes, the estimated milk production in the country has increased from 216 million tonnes in 1969-70 to 42.3 million tonnes (anticipated) in 1985-86.

(c) The Accepted policy of the Government is to foster and promote dairy development on cooperative lines as far as possible. With this in view, a National Dairy Project, known as Operation Flood has been launched in the country. The project is based on a three tier cooperative structure i.e. (1) Village Level Dairy Cooperative Societies of Milk Producers at the grass-root level, providing direct and indirect employment in the rural areas; (2) Unions of these village cooperatives at the district level; and (3) Federations of

these Unions at the State/apex level. The project provides employment in rural areas and helps to raise the income of the poorer sections.

Operation Flood Programme

*129. SHRI SURAJ PRASAD:
SHRI N. E. BALARAM:

Will the Minister of AGRICULTURE be pleased to state:

(a) whether it is a fact that the second phase of the Operation Flood Programme ended recently;
