

the colour TV sets, and we have given only last month. The sets have started coming into the market. I am confident, now that nearly 12 from the organised sector and 26 from the small scale sector have already got the import licences, they will all commence production in May and June. I am confident they will serve the masses by bringing the prices down.

SHRI SURESH KALMADI: Sir, the Minister has said just now that they have given licences to Indian firms to manufacture colour TV sets. I would like to know—(1) how many of these have started manufacturing; and (2) whether these companies were being given licences or manufacturing these components or are they indulging in screw driver technology.

SHRI M. S. SANJEEVI RAO: Sir, I have already informed this august House in the beginning itself that we are proud now that our ECIL and UPTRON have totally indigenised the sets by their own circuits. It is not an imported substitute at all. But still we have to import the component because there is no other alternative and we are not manufacturing the colour TV tubes and certain integrated circuits. As you are all aware that one month back the semi-conductor plant at Chandigarh have started manufacturing integrated circuits and we are confident it will manufacture them. Regarding the colour TV tubes, we have given three licences—one each for Punjab, Uttar Pradesh and Andhra Pradesh. We are also confident the colour TV tubes will be manufacture in two or three years time.

MR. CHAIRMAN: Question Hour is over.

WRITTEN ANSWERS TO QUESTIONS

Hindustan Computers Limited

*61. **SHRI J. K. JAIN:** Will the PRIME MINISTER be pleased to state:
