(a) the likely amount of oil pool deficit by the end of this year;

(b) whether the prices of petro-products need to be raised; and

(c) the steps taken to achieve the goal of full deregulation of the oil sector by 2002?

THE MINISTER OF STATE IN THE MINISTRY OF

PETROLEUM AND NATURAL GAS (SHRI SANTOSH GANGWAR): (a)

It is not possible to estimate the Oil Pool account position with accuracy as various factors like materialisation of estimated demand, fluctuation in international prices of crude oil/ petroleum products, foreign exchange variation, and domestic prices of controlled petroleum products which effect the balance.

(b) Review of petroleum products prices is continuous process.

(c) With a view to contain the deficit in the Oil Pool Account, the Government have taken a number of measures such as moving product prices towards import parity and gradual phasing out of subsidy on petroleum. Further, Government had decided in November, 1997 to dismantle the Administered Pricing Mechanism (APM) in a phased manner. Accordingly petroleum products except Motor Spirit (MS), High Speed Diesel (HSD), Aviation Turbine Fuel (ATF), Superior Kerosene Oil (SKO-PDS) and Domestic Liquefied Petroleum Gas (Domestic LPG) have been decontrolled effective 1.4.1998.
