(a) the percentage of works done by Civil Engineering and Mechanical Engineering of Flood Control Department, Delhi, separately and whether Government are aware that at least Rs. 3 crores has been spent by Flood Control Department, Delhi during the last few years through Civil Department although it would have been spent by the Mechanical Division; and

(b) if so, what are the reasons therefor?

THE MINISTER OF STATE IN THE MINISTRY OF IRRIGATION (SHRI RAM NIWAS MIRDHA): (a) and (b) The Delhi Administration has reported that percentage of works carried out by Civil Engineering Divisions is about 80 per cent and by Mechanical Division about 20 per cent. Delhi Administration has further reported that with the available machinery and skilled manpower the Department is able to execute only 15 to 20 per cent of the annual earth work through Mechanical Division. The Civil Engineering Divisions deploy thousands of manual labour, donkey labour and camel carts etc. offering employment opportunities to the poor strata of the society. The extensive embankment and drainage works are normally carried manually and mechanised means are generally adopted in some specific and difficult reaches.
