

Parliament has been that a passport office should be centrally located taking into account existing offices and should receive an average of 50,000 applications per annum. These criteria do not justify establishment of another passport office in Bihar.

### **Review of Nuclear Non-Proliferation**

2699. SHRI V.V, RAGHAVAN:

SHRI J. CHITHARANJAN:

Will the Minister of EXTERNAL AFFAIRS be pleased to state:

(a) whether a UN-sponsored international conference to review nuclear non-proliferation was held at New York recently;

(b) if so, the details and the gist of the discussion that took place and the outcome thereof;

(c) whether it is a fact that the five nuclear powers refused to accept a time table to accomplish the total elimination of their formidable nuclear arsenal; and

(d) if so, the Government's reaction thereto?

THE MINISTER OF STATE IN THE MINISTRY OF EXTERNAL AFFAIRS (SHRI AJIT KUMAR PANJA): (a) and (b) Yes, Sir. The 6th Review Conference of the Nuclear Non-proliferation Treaty (NPT) was held in New York from 24th April—20th May. The work of the Conference was organised around three Main Committees on Nuclear disarmament, Safeguards and Nuclear Weapon Free Zones and on Nuclear energy and peaceful applications. A subsidiary body on 'regional issues including with respect to Israel' was set up under the second Main Committee. The Conference adopted a final document.

(c) Yes, Sir.

(d) Government's position on this issue is contained in External Affairs Minister's suo motu statement in Parliament on 9 May 2000 which is given below as statement.

**Statement**

*Sou Motu Statement*

*By the Minister of External Affairs*

*On the NPT Review Conference*

The sixth Nuclear Non-proliferation Treaty (NPT) Review Conference is currently taking place in New York. Consistent with our policy India is not attending the Conference.

Since independence India has been a strong proponent of global nuclear disarmament and has taken numerous initiatives towards this objective. We remain committed to nuclear non-proliferation. India holds that genuine and lasting non-proliferation can only be achieved through agreements that are based upon equality and nondiscrimination, for only these can contribute to global peace and stability.

In 1995, the NPT was extended indefinitely and unconditionally. Hon'ble Members would be aware that 187 countries are today parties to the NPT. The proponents of NPT cite these developments as evidence of NPT's success; yet, it is also clear that there exist strong differences even among the NPT States Parties. Three of the Five Review Conferences held so far failed to reach any agreement on a 'final document\*'. The non-nuclear weapon States Parties *to* the NPT have increasingly left let down by the lack of progress on disarmament, as well as non-compliance with the basic provisions of the Treaty.

The nuclear weapon States Parties to the NPT and their allies have not diminished the role of nuclear weapons in their respective or collective security calculus; on the contrary, new doctrines and justifications have been developed. NATO's new strategic concept, announced last year, ten years after the end of the Cold War, goes to re-emphasising a need for the continued retention of nuclear weapons. The nuclear weapons sharing arrangements within NATO also pose serious questions about compliance. Such development are clear and continuing violations of the provisions of the NPT. This the NPT community has been unable to discuss, let alone deal with.

One of the basic obligations of the nuclear-weapon-states under

the NPT was to prevent further proliferation. The record on this has also not been satisfactory. The nuclear-weapon-states have either been active collaborators in or silent spectators to continuing proliferation, including exports of nuclear weapon related components and technologies.

After more than three decades, the nuclear weapon States Parties to the NPT remain to be persuaded to being any kind of collective, meaningful negotiations aimed at global nuclear disarmament. These countries were expected to display a special responsibility to implement Article VI ; instead, this special responsibility today appears to be arrogated as a permanent special right to possess nuclear weapons and only for their exclusive security.

India is nuclear weapon state. Though not a party to the NPT, India's policies have been consistent with the key provisions of NPT that apply to nuclear weapon states. These provisions are contained in Articles I , III and VI. Article I obliges a nuclear weapon state not to transfer nuclear weapons to any other country or assist any other country to acquire them and India's record on non-proliferation has been impeccable. Article III requires a party to the Treaty to provide nuclear materials and related equipment to any other country only under safeguards; India's exports of such materials have always been under safeguards. Article VI commits the parties to pursue negotiations to bring about eventual global nuclear disarmament. It needs to be emphasised that India today is the only nuclear weapon state that remains committed to commencing negotiations for a Nuclear Weapons state that remains committed to commencing negotiations for a Nuclear Weapons Convention, in order to bring about a nuclear-weapon-free-world, the very objective envisaged in Article VI of the NPT.

After the tests undertaken by India in May, 1998, we have declared that India shall only maintain a minimum credible deterrent and not engage in any arms race. The role of India's nuclear weapons is defensive; accordingly, India has announced a policy of no-first-use and a policy of non-use against non-nuclear weapon states. In fact, this meets the demand of unqualified negative security assurances,

raised by the large majority of non-nuclear weapon states to ensure their security. India has also indicated readiness to provide requisite assurances to the nuclear-weapon-free-zones in existence or those being negotiated. We have also taken new initiatives calling for de-alerting of nuclear weapons as a means of reducing the risk of accidental or unauthorised launch.

The NPT community needs to understand that India cannot join the NPT as a non-nuclear weapon state. Statements by NPT States Parties about India rolling back its nuclear programme are mere diversions to prevent focussed attention on the basic goals of the NPT.

India's commitment to global nuclear disarmament and lasting non-proliferation remains undiluted. While willing to commence negotiations on Nuclear Weapons Convention, India also remains ready to participate in agreed and irreversible steps to prepare the ground for such negotiations. A global no-first-use agreement and a non-use agreement against non-nuclear weapon states would meet the longstanding requirement for legally binding negative security assurances and assurances to nuclear-weapon-free zones. Another positive development would be a commitment by nuclear weapon states not to deploy nuclear weapons outside their own national territories. Nuclear weapon states also need to take steps to lower the alert status, through gradual de-alerting actions, consistent with policies of no-first-use and the defensive role of nuclear weapons. Tactical weapons that lend themselves to war fighting roles need to be eliminated. These would be some positive and concrete steps in the right direction.

India has been a responsible member of the international nuclear non-proliferation regime and will continue to take initiatives and work with like-minded countries to bring about stable, genuine and lasting non-proliferation, thus leading to a nuclear-weapon-free-world.
