

(b) The procurement of wheat during current Rabi Marketing Seasons (RMS) 2006-07 was 92.23 lakh tonnes as compared to 147.71 lakh tonnes during Rabi Marketing Season (RMS) 2005-06. Due to decline in procurement by 55.48 lakh tonnes buffer norms have not been met.

(c) No, Sir.

(d) Steps taken by Government to manage the dwindling stocks of wheat in the Central Pool are as follows:—

- (i) The allocation of wheat under Targeted Public Distribution System (TPDS) has been streamlined for all the States/UTs. on the basis of past offtake, without reducing the overall entitlement of foodgrains @ 35 kg. per household per month
- (ii) In order to cater to the local tastes as well as to help the farmers in production of foodgrains other than wheat and rice, a higher allocation of coarse-grains (e.g. Jowar, Bajra, Maize, Ragi, etc.) at highly subsidized rate is being made to various State Government who have demanded for the same.
- (iii) A decision has been taken to stop the sale of wheat under the Open Market Sale Scheme (OMSS-D) during the year 2006-07.
- (iv) A decision has been taken to import 35 lakh MTs of wheat.

(e) The reasons for less procurement:—

- (i) Lower than targeted production of wheat in Crop year 2005-06.
- (ii) High ruling market prices.
- (iii) Negative market sentiments due to low level of wheat stocks in the Central Pool.
- (iv) Low market arrivals of wheat in RMS 2006-07.
