

Cb) whether it is a fact that the airfield at Port Blair is not strong and large enough to enable the Boeing to take the full load of passengers; and

(c) if so, what steps Government are taking to develop the airfield?

THE MINISTER OF TOURISM AND CIVIL AVIATION (SHRI PURUSHOTTAM KAUSHIK): (a) The capacity offered on Boeing 737 bi-weekly service between Calcutta and Port Blair is about 100 seats each way. Its average occupancy is 55-60 passengers each way.

(to) The runway load bearing strength is not adequate for operation of Boeing 737 aircraft with full load. The use of full length of the runway and all weather bi-directional operations are not possible due to the hills in the approach of each end of the runway.

(c) The existing aerodrome can be developed only for visual uni-directional operations for Boeing-737. The comparative economics of developing the existing aerodrome and constructing a new aerodrome at an alternative site are being studied in view of the heavy investment involved in either case.
