Will the Minister of STEEL AND MINES be pleased to refer to the reply to Starred Question 794 given in the Rajya Sabha on the 23rd December, 1977 and state: what are Government's proposals for further exploring and exploiting the mineral resources in the Andaman and Nicobar Islands?

THE MINISTER OF STEEL AND MINES (SHRI BIJU PATNAIK): Mineral investigations in Andaman and Nicobar group of Islands by Geological Survey of India are still continuing and the programme during the current field season (1977-78) includes survey of ultramafic rocks for platinum, cobalt, nickel, chromium etc.; search for diatomaceous earth and an integrated survey for copper mineralization.

The investigations are still at a preliminary stage and until these have been completed and economic viability of the deposits established, the question of any exploitation of these minerals is premature.
