SINGH:

Will the Minister of AGRICULTURE AND IRRIGATION be pleased to state:

(a) whether there has been an increase in the prices of wheat and pulses during the last few months;

(b) if so, what are the varieties affected thereby; and

(c) what steps have been taken by Government to control their prices?

THE MINISTER OF STATE IN THE MINISTRY OF AGRICULTURE AND IRRIGATION (SHRI BHANU PRATAP SINGH): (a) and (b) Yes, Sir. The price indices of wheat and pulses were higher on 18th November than what they were on 1st July. The increase in the case of wheat is due to seasonal variations in supplies and in the case of pulses due to stagnation in production. The index of urad pulse was, however, constant.

(c) Efforts are being made to increase the production of pulses by increasing the area under pulses and also by improving productivity. Import of pulses has been placed on Open General Licence (OGL) since April, 1978. As regards wheat and wheat products, all restrictions on movement of these commodities have been removed so that sufficient quantities are available in the open market. Government are also meeting fully the requirements of the State Governments for distribution of wheat and rice through the Public Distribution System at subsidised prices
