

ten years or more in a Nationalised Bank so that a monthly income of about Rs. 200 would accrue to each of the affected families.

(b) The Chasnalla Colliery consists of (i) deep mine where the accident of December, 1975 took place; (ii) quarries; and (iii) 7th cross cut incline. One quarry is being operated and another is expected to start production by the beginning of July 1976. The 7th cross cut incline is likely to start operating from the first week of July, 1976. In view of the risks involved in undertaking repairs at present in the deep mine and the approaching monsoon, it has been decided that the mine may be allowed to be inundated gradually after withdrawing the equipment. The date by which the mine should be dewatered and recommissioned, will be finalised after receipt and examination of the Techno-Economic Report of Central Mines Planning and Design Institute of Coal India Ltd.

(c) and (d) All the workers are being deployed in stabilisation work of different areas, drainage work and other jobs to keep the mine safe from the ensuing monsoon. No worker had been laid off or retrenched.]
