

commissioned. Discharge of water from Farakka Barrage is expected to reduce, after some years, the expenditure on river dredging and permit maintenance of better draught which in turn would permit bigger and larger number of vessels to come up to Calcutta. This in turn is likely to lead

to greater traffic and increased revenue. It is, however, too early for such an impact to be felt now.

(b) The figures of earnings of Calcutta Port and the volume of traffic handled during the last 3 years are as follows :

Items	1973-74	1974-75	1975-76
Revenue (Rs. in lakhs)	3095.10	4214.35	5588.00*
Traffic (lakh tonnes)	63.25	75.36	76.98

The increase in earnings is due to an increase in the traffic and a revision of Port tariffs.

\*Tentative. Final figures will be available only on finalisation of annual accounts which will be ready by end of June 1976.
