#### Survey of profit and capital structure of textile industry

319. SHRI KALYAN ROY: Will the Minister of Commerce be pleased to state:

(a) whether Government have made any survey of the profit and capital structure of the textile industry during the last five years;

(b) if so, what are the results thereof; and

(c) what steps have been taken to reduce the prices of textiles in view of the falling rate of profit in the textile industry?

THE MINISTER OF COMMERCE (PROF. D. P. CHATTOPADHYAYA) : (a) to (c) A statement is laid on the Table of the House.

#### Statement

No survey of the profit and capital structure of the whole of the textile industry as such has been made by the Government during the last 5 years. However, the Reserve Bank of India has compiled the profitability data covering 272 cotton textile mills for the year 1971-72. The results are indicated in the attached statement which also indicates the profitability data in respect of all companies. It is observed that the profit ratios of the cotton textile companies are not higher than the profits made by all companies.

2. Prices of textiles are, as in case of other industries, determined by the relevant production factors, such as cost of raw materials, wages and over-head expenses which have been rising. However, in order to ensure the supply of cotton fabrics of mass consumption at moderate prices to the vulnerable sections of the population, a statutory obligation has been imposed on cotton textile mills to produce certain specified varieties of cloth for sale at fixed prices. Under this obligation, the mills are required to produce 800 million sq. meters of the specified varieties of cloth for the year commencing 1-4-1974 for sale at fixed prices which are below the levels of their production cost.
