

(d) what was the production target fixed for both these varieties for the national requirement for the year 1974-75?

THE DEPUTY MINISTER IN THE MINISTRY OF AGRICULTURE AND IRRIGATION (SHRI PRABHUDAS PATEL): (a) to (c) The official estimates of production of cotton for 1974-75 are not yet available. However, due to rapid spread of high yielding and quality cottons, the production of long-staple cottons is likely to be more than the previous year. On the other hand, on account of widespread drought in Gujarat, Tamil Nadu and parts of Rajasthan and Maharashtra, where medium staple cottons are grown under unirrigated conditions, there is likely to be shortfall in production of this category. No shortfall is anticipated in regard to short staple cotton.

(d) Staple-length wise targets of cotton production are not fixed. However, the overall target of cotton production during 1974-75 was fixed at 68 lakh bales.
