THE MINISTER OF STATE IN THE MINISTRY OF AGRICULTURE (SHRI ANNASAHEB SHINDE) : (a) to (c) Firm estimates of rabi production during 1972-73 would become available only after the close of the agricultural year, that is, some time in July-August, 1973. However, as a result of the Emergency Agricultural Production Programme launched by the Government and the beneficial winter rains, production of rabi crops is expected to show an increase over 1971-72 in some of the States like Uttar Pradesh, Bihar, Punjab and Haryana. In the States I

of Maharashtra, Gujarat and Rajasthan, where rains have continued to be deficient in the rabi season, rabi crop output may register some fall. The overall shortage of power and fertilisers might affect to some extent the production which otherwise on account of the special efforts would have registered a substantial rise. According to present indications, total production of rabi foodgrains for the country as a whole, is expected to be higher than last year.
