

2. The discussions led to a greater understanding on both sides of the benefits particularly of the Limited Payments Arrangement for trade between the two countries.
3. It was recognised that the Limited Payments Arrangement was as good as trade under any free foreign exchange arrangement. It was noted that exports under the Limited Payments Arrangement would qualify for all the normal export benefits like refund of excise duty, duty draw-back, import replenishment etc. and that it would therefore be in the mutual interest of both India and Bangladesh to buy and sell at internationally competitive prices.
4. Accordingly,
  - (i) the price at which one country expects to buy an article from the other would correspond to the price at which it buys similar articles from third countries ; and
  - (ii) the price at which one country expects to sell an article to the other would correspond to the price at which it sells similar articles to a third country.
