NEW TECHNIQUE FOR PRODUCING
LEATHER GOODS

739. SHRI K. L. N. PRASAD. Will the Minister of SCIENCE AND TECHNOLOGY be pleased to state whether a new technique for producing attractive leathers and leather articles from rejected goat and sheep skins has been developed by its Central Leather Research Institute, Madras, and if so, the details thereof?

THE MINISTER OF SCIENCE AND TECHNOLOGY (SHRI C. SUBRAMANIAM) The Central Leather Research Institute (CLRI), Madras has developed two processes for utilising defective skins. One process is "Tie and dye", otherwise known as "Bandhi" process, by which leathers made from such skins are given multi-colour effects for making fashionable items like hand bags, pouches, garments, slippers etc.

By the other process, screen and block printing is done on rejected leathers which not only cover the defects on the leathers but also give them an attractive look.

Both the leathers can be produced in the small scale as well as in the large scale sectors.
