OBEROI:

Will the Minister of AGRICULTURE be pleased to state :

(a) whether a study conducted by the National Council Applied Economic Research has revealed that various cliques and pressure groups of the village level have greatly obstructed the flow of Co-operative Credit to the deserving farmers and as a result the agricultural production has suffered set backs in certain States; and

(b) if so, what steps Government propose to take to eliminate such cliques and pressure groups from the Co-operative movement ?

THE DEPUTY MINISTER IN THE MINISTRY OF AGRICULTURE (SHRI JAGANNATH PAHADIA): (a) The report on the Study conducted by National Council of Applied Economic Research states that credit cooperatives are prone to local influence, hierarchical consciousness, casteism etc. which result in cooperative societies being managed by a small group of persons. Managing Committees, in some cases are a close preserve of a few families who try to limit the entry of others into the Cooperative fold. In such cases, the economically weaker sections do not receive the benefit of cooperative membership and credit for Agricultural production.

(b) The State Governments have been advised to take the following steps to eliminate vested interests of the type pointed out in the Report.

(i) Limitation of number of societies in which a person can hold office be a member of the Committee of Management.

(ii) Restriction regarding maximum period for holding office and provision of time gap for being eligible for re-election.

(iii) Exclusion of money-lenders etc. from becoming members of Cooperatives.

(iv) Reservation of seats on the Board of Management of Cooperatives for weaker Sections.

(v) Regulation of loans to office bearers.

(vi) Regular election by an independent authority.
