UTILISATION OF WASTE OF TEA AND BAGASSE.

589. SHRI SURAJ PRASAD: Will the
Minister of INDUSTRIAL DEVELOPMENT/
औद्योगिक विकास मंत्री be pleased
to state:

(a) whether it is a fact that according to
the research conducted by the Jorhat
Laboratory the cost of production of tea
and sugar would be cut down substantially
if waste products of tea and bagasse are
used for making caffeine and paper
respectively; and

(b) if so, what is Government's reaction
thereto?

THE DEPUTY MINISTER IN THE
MINISTRY OF INDUSTRIAL
DEVELOPMENT,
औद्योगिक विकास मंत्रालय में उपमंत्री

(PROF. SIDDHESHWAR
PRASAD):

(a) and (b) The experiments conducted at
the Regional Research Laboratory, Jorhat,
are reported to have shown that if the
waste products of tea and bagasse are
utilised for making caffeine and paper
boards, the cost of production of tea and
sugar would come down. However, the
extent to which the costs would come
down is not known. Further, the release of
bagasse for the paper industry is
contingent upon the availability of an
alternate fuel such as coal or furnace oil at
a price not detrimental to the sugar
industry. Use of alternate fuel by sugar
industry will also involve modification of
the existing boilers which in turn involves
additional investment by sugar mills. The
exploitation of the process is in the ex-
perimental stage.
