

It will be seen that the total production of steel ingots and saleable steel declined during April-June, 1971 as compared to January-March, 1971, by about 1.16 lakh tonnes and 1.23 lakh tonnes respectively. Production at Durgapur, however, increased during April-June, 1971 compared to January-March, 1971.

(c) Main reasons for shortfall in production :

Bhilai.—Production in some units of Bhilai Steel Plant has been affected since middle of May, 1971 due to breakdown in the Coke Ovens and consequent shortage of Coke oven gas.

Rourkela.—The Plant suffered from unforeseen break-downs, and Power failure.

TISCO.—TISCO had problems associated with shortage of Coke, LSHS oil and furnace oil.

IISCO.—One blast furnace was taken off for relining in the third week of April.

Steps being taken to increase production.—Sustained efforts are being made to increase production to the maximum possible extent and they include (1) Special attention to the maintenance organisation (2) Supply of adequate refractories.
