

for carrying out further investigations, formulation of detailed project reports and planning and procurement of necessary plant and equipment for these stations is being initiated. New generation schemes to be taken up have already been identified. More inter-state and inter-regional transmission lines are being planned to help integrated operation of power system so as to enable optimum utilisation of the available power generating capacity. A total generating capacity of 52 million kW by 1980-81 is visualised under this Plan.
