Retail Trade & Small Business (including fruit and vegetable vendors)	19.22	41.53

♦Provisional.

(b) In the case of Road Transport Operators advances are generally granted against the security of a comprehensive insurance cover, hypothecation of the vehicle and supported, where felt necessary by the banks, by guarantees of third parties. The amount of advance is around 66-75 per cent to 80 per cent to 80 per cent of the value of the vehicle. However, some banks have self-employment schemes under which lower margins are charged. In the case of Cycle-rikshaw advance is made where necessary even for the entire cost of the vehicle subject to a maximum of Rs. 750. The loans are generally repayable in suitable instalments extending over 2 to 3 years.

For Small-scale industry, advances are granted for working capital, for inventory and also for purchase of machinery and other fixed assets. They are financed with varying margins of 10-40 per cent depending on the type of raw material, component or equipment or asset to be financed. The security required is a comprehensive insurance cover, hypothecation of stock, mortgage of land or other property and other collateral guarantees,

where necessary. What the banks look for more than anything is the viability of the scheme/project and the integrity of the borrower. The Loans are repayable in suitable instalments over a period of 5 to 10 years. For working capital, however, only limits are prescribed which are reviewed from time to time.

Advances to retail trade are available for working capital and also for furniture, fixtures, repairs and renovation to the shop. Retail shopkeepers with adequate experience and reputation for integrity are eligible for the loans. Security required is pledge [hypothecation of stock and/or equipment, general insurance cover and guarantee etc.]. Loans are granted generally for 50 to 80 per cent of the requirements of working capital and upto 75 per cent of the cost of furniture, fixtures, repairs etc. subject to a maximum of Rs. 25,000. These are repayable in suitable instalments which extend from daily instalments to periods not exceeding 4 years.

There has been a reduction in the rate of production from North Gujarat oilfields due to water-cutting, choking with wax etc. Horizons in the Kalol field are also not as good as earlier envisaged. In the normal course, Ankleshwar fields also will begin to decline progressively after 1975-76.
