

field of agricultural research. That shows that our scientists are making a very valuable contribution, those who are working in our various institutes and at least we have not found any difficulty in having scientists for doing this agricultural research work.

SHRI RAM NIWAS MIRDHA: Sir, we talk of a breakthrough in agriculture; we are very happy to note that a lot has been done. But whatever new seeds have been evolved or new techniques are in force, they cover largely speaking only the irrigated areas, hybrid seeds, whether it is wheat or it is rice; they cover only the irrigated areas which are very small areas compared to the vast areas which are unirrigated in our country. Unless there is a breakthrough in the rainfed areas where there is no irrigation system, there would be no solution to the problem of agriculture in India. So we would like to have the assessment from the hon. Minister as to the nature and type of work done up till now in these rainfed areas and unirrigated areas. How long will it take to achieve the same stage of breakthrough as we have done in the irrigated areas?

SHRI ANNASAHEB SHINDE: Sir, I appreciate the viewpoint of the hon. Member. Even after harnessing all the water resources in our country quite a large part of land is likely to be rainfed. That is why we are attaching as much importance to the rainfed crops as to those under irrigation conditions. But I may submit, Sir, that this activity of research in regard to the rainfed crops is very complicated; it is a difficult activity and nowhere in the world have they really succeeded in bringing about a complete breakthrough. In our country this research has been taken up. The hon. Members are aware that the Arid Research Institute is doing quite good work in this matter. In our country recently the scientists have come to the conclusion that it is possible to have good results in regard to this research activity. Personally I feel that we are at a stage when it is possible to adopt more strains on a large scale in a number of

of areas; I have already mentioned some of the strains in my reply to the main question.

MR. CHAIRMAN: Next question. No. 129. Mr. Khaitan is absent. The Question Hour is over.

## WRITTEN ANSWERS TO QUESTIONS

### दिल्ली पोलिटेक्नीक के छात्रों के लिए छात्रवृत्तियाँ

\* 126. श्री सुरज प्रसाद : क्या समाज कल्याण मंत्री 13 अगस्त, 1968 को राज्य सभा में तारांकित प्रश्न संख्या 363 के दिये गये उत्तर को देखेंगे और यह बताने की कृपा करेंगे कि :
