†[THE MINISTER OF STATE IN THE MINISTRY OF FOOD, AGRICULTURE, COMMUNITY DEVELOPMENT AND CO-OPERATION (SHRI ANNA-SAHEB SHINDE): (a) No country-wide survey has been conducted by the Government of India to find out the different varieties of seeds which would be best suited for each area and the types of crops which would yield highest profits when sown in each area. But, under the all-India research projects on crop improvement sponsored by the I.C.A.R., such as those dealing with rice, wheat, maize, jowar and others, simultaneous testing of high yielding promising crop varieties, evolved at the different research centres in the country, is taken up all over the country on a regional and zonal basis with a view to demarcate the area of adaptability of the different strains. On the basis of the data made available by such co-ordinated trials, high yielding varieties are recommended for release for general cultivation in areas to which particular variety or varieties are suited.

(b) Multilocational testing taken up under the co-ordinated projects has resulted in the release of high yielding fertiliser responsive varieties and hybrids of the major food crops for general cultivation. Mention can be made of the following releases :—

1. *Wheat*: Lerma Rojo, Sonora 64, Sharbati Sonora, Kalyansona, Safed Lerma, S.331, Sonalika.
2. *Rice*: Taichung Native 1, IR. 8, Taichung 65, Tainan 3, ADT. 27.
3. *Jowar*: CSH.1 and CSH. 2.
4. *Bajra*: H.B.1 and H.B. 2.
5. *Maize*: Hybrids Himalaya 123, Ganga 101, Ganga 3, Ganga Safed 2, Deccan, Ranjit, Hi-starch and the "Compositas"-Ambar, Jawahar, Vijay, Vikram, Sona and Kissan.]
