CONSUMPTION OF COAL BY RAILWAYS

393 SHRI SURJIT SINGH ATWAL: Will the Minister of STEEL AND MINES be pleased to state the steps that are being taken to replace about 2·5 million tonnes of coal of selected grades by that of lower grades for consumption by Railways?

THE MINISTER OF STEEL AND MINES (SHRI N. SANJIVA REDDY): The present trend of utilisation of different grades of coals by the Railways, is as under·—

	(Million tonnes per annum)
Selected grades . . .	2·7
Grade I and below . . .	14·3
TOTAL . . .	17·0

Selected grades of coal are necessary for running mail and express trains and also for those passenger and through goods services which are worked by locomotives designed by the British Engineering Standards Association (B E S A). Therefore only 2·7 million tonnes of selected grades of coal are being supplied to Railways out of their total requirement of 17 million tonnes There is little scope for reducing the requirements of selected grades further.
