STATEMENT

The estimate of foreign exchange needed for attaining the capacity targets mentioned in column 5 of the tabular statement at pages 65 to 71 of the "Appraisal and Prospects of the Second Five Year Plan" is based on a study of:

(1) The revised foreign exchange requirements taking into account the various factors that have led to the rise in cost of imported capital goods;

(2) The import licences granted for purchase of machinery and arrangements for inflow of foreign capital and/or deferred payments in respect of supply of machinery actually finalised or assessed to be reasonably assured;

(3) The balance of foreign exchange required to be provided where import licences were con-

sidered to have inadequately covered the full foreign exchange cost in relation to specific projects as well as the capacity kept in view.

The data relating to foreign exchange sanctions relate to the period of the Second Five Year Plan ending March, 1958, which were made the basis of the Appraisal published in May 1958. The foreign exchange made available to the different industries up to March 1958 and further foreign exchange allotted industry-wise in the subsequent period ending October, 1958 are as under:
