THE MINISTER FOR AGRICULTURE (DR. P. S. DESHMUKH): The patchouli plants have been introduced only on a small scale in Madras and Mysore States and experimentally at Dehra Dun.

SHRI M. GOVINDA REDDY: May I know the quantity grown in these States?

DR. P. S. DESHMUKH: We have not got any figures relating to the quantity or to the area. It is very insignificant because it has just been started.

SHRI M. GOVINDA REDDY: Are Government aware that this is a dollar earning plant?

DR. P. S. DESHMUKH: I am prepared to take the information from the hon. Member.

SHRI M. GOVINDA REDDY: Will Government consider expanding the area under cultivation of this plant and also consider giving financial assistance to the growers?

DR. P. S. DESHMUKH: We are interested in larger cultivation of this plant; we shall see what we can do about it.

SHRI M. GOVINDA REDDY: Are Government aware that scent is being manufactured from this in Mysore and that it is exported?

DR. P. S. DESHMUKH: I must ask for notice. I know that Mysore grows some of these plants.

SHRI H. P. SAKSENA: Where is this patchouli plant grown and what is it like?

DR. P. S. DESHMUKH: The Latin name of this plant is *Pogostemon cablin* and it is grown at present in the Mysore and Madras States. As I stated earlier, it is also grown experimentally at Dehra Dun. It is not a local plant.

SHRI H. P. SAKSENA: What is it used for?

(No reply.)
