Power generation in Bihar

1683. SHRI RAM KRIPAL YADAV: Will the Minister of POWER be pleased to state:

(a) whether Government has fixed any target for power generation in Bihar during the Eleventh Five Year Plan;

(b) if so, the details thereof and the achievements made by the end of the Plan;

(c) whether any target is fixed for the Twelfth Five Year Plan in the State, in view of acute shortage of power there and how much investment would be required; and

(d) if so, the details thereof?

THE MINISTER OF STATE IN THE MINISTRY OF POWER (SHRI K.C. VENUGOPAL): (a) and (b) The target for generation of power is fixed on year-to-year basis and not for Five-Year Plan as a whole. Capacity addition target (in MW) is set for a Five Year Plan period. Based on the preparedness of generation projects, Planning Commission had fixed a capacity addition target of 78,700 MW during 11th Plan on an All India basis. This included 1000 MW capacity addition in the State of Bihar in Central Sector. No capacity addition was envisaged in State/Private sector in Bihar during 11th Plan. Capacity addition achieved during 11th Five Year Plan in Bihar was 1000 MW in Central Sector.

(c) and (d) As per the Report of Working Group on Power for 12th Five Year Plan, projects totaling to 4,690 MW are under execution in the state of Bihar in Central Sector/through Joint Venture, for likely benefits during 12th Five Year Plan. Bihar will have share in these projects. As per the Report of Working Group on Power for 12th Five Year Plan, the investment required during 12th Plan in power sector (on all India level) would be of the tune of Rs. 13,72,580 crores including funds required for generation, transmission, distribution, captive power plants, R&M of power plants, Research and Development, DSM, fund required for RE (Renewable Energy) projects etc. This also includes advance action funds requirement for 13th Plan projects.

Under achievement of capacity addition targets

1684. SHRIMATI MAYA SINGH: Will the Minister of POWER be pleased to state:

(a) whether it is a fact that power generation target was scaled down from 78,000 MW to 63,000 MW during the Eleventh Five Year Plan and finally only 54,800 MW new power capacity could be added;

(b) if so, the reasons therefor; and

(c) whether Government plans to increase power generation through renewable energy resources and add clean power to the power pool?
