Low availability of hospital beds

2630. DR. K. V. P. RAMACHANDRA RAO: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether it is a fact that the availability of beds in the hospitals in the country is much less as compared to the population and not in accordance with the norms prevalent at international level; and

(b) if so, the details thereof, and the reasons therefor ?

THE MINISTER OF HEALTH AND FAMILY WELFARE (SHRI JAGAT PRAKASH NADDA) : (a) and (b) As per National Health Profile, 2013 compiled by Central Bureau of Health Intelligence under the Ministry of Health and Family Welfare, the total number of beds available in Government hospitals in Rural and Urban areas (including CHCs) are 628708.

There is no global norm for the density of hospital beds in relation to total population.

Implementation of JSY

2631. DR. K. V. P. RAMACHANDRA RAO: Will the Minister of HEALTH AND FAMILY WELFARE be pleased to state:

(a) whether it is a fact that Government is implementing Jnani Suraksha Yojana (JSY);

(b) if so, the objects of the scheme;

(c) the achievements made under the scheme; and

(d) whether Government proposes to review the scheme?

THE MINISTER OF HEALTH AND FAMILY WELFARE (SHRI JAGAT PRAKASH NADDA): (a) Yes.

(b) The objective of the scheme is to reduce maternal and neonatal mortality by promoting institutional delivery among pregnant women.

(c) As regards achievement, JSY has been a success both in terms of number of mothers covered under the scheme and the expenditure incurred. The number of beneficiaries has increased from a modest figure of 7.39 lakhs in 2005-06 to 106.48 lakhs beneficiaries in 2013-14. Also, the utilization of funds has increased from 38 crores in 2005-06 to 1762.82 crores in 2013-14. The scheme is considered to be one of the major contributory factor towards increased utilization of public health facilities by the pregnant women for delivery care services, which is evident from the following:

- Institutional deliveries has gone up from 47% (District Level Household Survey-III, 2007-08) to 73.1% (SRS-2012);
- Maternal Mortality Ratio (MMR) has declined from 254 maternal deaths per 1,00,000 live births in 2004-06 to 178 maternal deaths per 1,00,000 live births during 2010-12;
