Notes: The base lending rate for IBRD Flexible Loans in most currencies is currently the 6-Month LIBOR in the relevant currency. Find information on LIBOR rates on the website of the British Bankers' Association. For information about EURIBOR rates, visit the website of the European Banking Federation.

1. IBRD lending rates include a standard lending spread comprising a contractual spread of 0.50% and,

where applicable, an annual maturity premium. The lending rate also includes a charge to cover the bank's cost to fund the loans relative to the base lending rate and a market risk premium (for fixed spreads). DDO disbursements are priced at the prevailing spread over 6-Month LIBOR at the time of drawdown. Effective February 11, 2014, there is a surcharge of 50 basis points per annum on loan balances in excess of \$16.5 billion for Brazil, China, Indonesia, and Mexico and in excess of \$17.5 billion for India.

2. Lending rates for loans approved between June 30, 2010 and June 30, 2014, including disbursements of IBRD loans with a Deferred Drawdown Option (DDO) during this period, and loans for which the Invitation to Negotiate was issued on or before June 30, 2014 and approved by the Executive Directors on or before September 30, 2014, include an annual maturity premium of 0.10% for loans with average repayment maturities of greater than 12 to 15 years, or 0.20% for loans with average repayment maturities of greater than 15 to 18 years. For loans approved after June 30, 2014 (with the exception of those for which the Invitation to Negotiate was issued on or before June 30, 2014 and approved by the Executive Directors on or before September 30, 2014), please refer to the February 11, 2014 news announcement.
3. The fixed spread is determined at loan signing and remains constant over the life of the loan. "Fixed Spread" means the Bank's fixed spread for the initial loan currency in effect at 12:01 a.m. Washington, D.C. time, one calendar day prior to the date of the Loan Agreement.
4. The variable spread is recalculated every January 1 and July 1.
5. As measured by average repayment maturity of the loan at commitment (*i.e.* Board approval). The calculation of the average repayment maturity for DDOs will begin at loan effectiveness for the determination of the applicable maturity premium.
6. All new Euro-denominated loans for which the invitation to negotiate was issued on or after July 31, 2010 will have Euribor as the base lending rate.
7. Development Policy Loans (DPL) with a Deferred Drawdown Option (DPL DDO) carry a 0.25% front-end fee, plus a stand-by fee of 0.50%. DPLs with a Catastrophe Risk DDO (Cat DDO) carry a 0.50% front-end fee, plus a 0.25% renewal fee.
8. In addition to the above, a commitment fee of 0.25% is charged on undisbursed balances and begins accruing 60 days after the Loan Agreement is signed. The Bank does not charge commitment fee for loans that fail to become effective.

### C. Terms and Conditions of ADB Loans

India borrows from the ADB within the overall external debt management policy pursued by the Government which focuses on raising funds on concessional terms from less expensive sources with longer maturities. We started borrowing from ADB [Ordinary Capital Resources (OCR) only] in 1986. Although India is eligible to draw partly from the Asian Development Fund (ADF) which provides concessional funding, India has consciously opted out of this facility to allow the Least Developed Countries (LDCs) to avail of this facility.

The ADB follows the calendar year for all its programs and projects.

### Graduation Policy

Under the Graduation Policy approved by ADB in December 1998, developing countries are classified on the basis of (i) per capita GNP and (ii) Debt repayment capacity. Modification to this policy has been recently approved by the Board in April, 2008. DMCs are categorized into three groups:

**Group A** - DMCs with access to only Asia Development Fund (ADF)

**Group B** - Access to a blend of ADF and OCR

**Group C - Access to OCR only**

India is placed in Category B, *i.e.*, we have to contribute more than 20% of the total cost of the Loans drawn (usually in the form of counterpart Staff and Infrastructure Costs). As stated earlier, although India is eligible for ADF, it does not access the facility in order to avoid crowding out other eligible countries.

**Ordinary Capital Resources (OCR) Charges****• Rate of Interest**

India has been accessing ADB's OCR which is LIBOR-based loan (LBL) product since its introduction on 1st July 2001. Prior to that from 1986, India had accessed Pool based Multicurrency loans. Until June 30, 2001 interest on the earlier loans was 6.70% (US \$ loan), but, under the LBL, the interest rate is floating and current applicable rate was LIBOR + 20 bps for loans negotiated on or after 1st October 2007, rate was revised to LIBOR + 30 bps for loans negotiated on or after 1st July, 2010 and further revised to LIBOR + 40 bps for loans negotiated on or after 1st July, 2011.

**• Commitment Charges**

For project loans negotiated prior to December 31, 2006 commitment charges are levied @ 0.75% on: (i) 15% of undisbursed loan balances for the first year; (ii) 45% of undisbursed loan balances for the second year; (iii) 85% of undisbursed loan balances for the third year; and (iv) 100% of undisbursed loan balances from the fourth year onwards.

India had been consistently raising the issue of lowering the cost of ADB financing. Keeping in view the overall reduction in the cost of international development finance, ADB has also changed its terms of lending to reduce the cost of lending. For project loans negotiated on or after 1st January 2007, the commitment charges are levied on a flat rate of 0.35% on the un-disbursed loan balances. This has been further reduced to **0.15% for both Program and Project Loans for loans negotiated on or after 1st October 2007.**

**• Front-end-Fee**

The ADB Board in its meeting on 7th December 2007 announced the elimination of the front-end-fee for all loans negotiated on or after 1st October 2007. Earlier, it was one-time payment of 0.5% of total loan amount.

**• Maturity Premium**

The ADB Board in its meeting in December, 2011 announced the introduction

of the following maturity premiums for all the loans negotiated on or after 1st April, 2012:

- A maturity premium of 10 basis points per annum on loans with an average loan maturity of greater than 13 years and up to 16 years;
- A maturity premium of 20 basis points per annum on loans with an average loan maturity of greater than 16 years and up to 19 years; and
- That the average loan maturity of loans shall not exceed 19 years.

#### **Normal Repayment Period**

The normal repayment period for a Project Loan is 20 years plus a grace period of 5 years and for the Program Loan it is 15 years plus a grace period of 3 years.

#### **D. IFAD'S lending terms and conditions interest rate for 1999 for loans on ordinary and intermediate terms**

1. In September 1995, the Fifty-Fifth Session of the Executive Board approved document EB 95/55/R.45 authorizing the President to establish the IFAD rate of interest routinely on the basis of the IBRD (International Bank for Reconstruction and Development) July-December variable interest rate, without prior Board approval, but on the understanding that the Board would be notified of the rate of interest so established.
2. Accordingly, the Executive Board is hereby informed that the IFAD rate of interest for 1999 has been set at 6.18% for loans on ordinary terms and 3.09% for loans on intermediate terms.
