Low rank in Global Hunger Index

2190. SHRI PRABHAKAR REDDY VEMIREDDY: Will the Minister of PLANNING be pleased to state:

(a) whether it is a fact that in the recently released Global Hunger Index, India ranked 102nd out of 117 countries mapped;

(b) whether it is also a fact that the Index placed India among the countries that have 'serious' levels of hunger;

(c) what are the reasons that hungry people in India have gone up from 785 million in 2015 to 822 million in 2018;

(d) what is the present status in 2019; and

(e) the manner in which the country can achieve Zero Hunger by 2030 at this pace as per Sustainable Development Goals (SDG)?

THE MINISTER OF STATE OF THE MINISTRY OF PLANNING (RAO Inderjit Singh): (a) and (b) Yes, Sir. It may be informed that calculation of the Global Hunger Index, 2019 is based on four indicators namely: the percentage of population that is undernourished (weightage 1/3rd); percentage of children under five years old who suffer from wasting, percentage of children under five years old who suffer from stunting (weightage 1/3rd) and child mortality (weightage 1/3rd). As per our estimates, the way index is constructed over 70% of the weightage of index is on child undernourishment, which in itself is on account of multiple social determinants and deprivations and its impact; therefore the Index does not reflect on the levels of hunger/ lack to access to food in general population.

(c) and (d) No Sir, the figures stated is for worldwide not for India. However, indicator wise performance of India from 2004 to 2018 published in GHI Reports is depicted in the table below:

	Proportion undernourishment			Prevalence of wasting			Prevalence of stunting			Under mortality		
	04-06	09-11	16-18	04-06	09-11	16-18	04-06	09-11	16-18	04-06	09-11	16-18
Year												
Score	22.2	17.5	14.5	20	16.5	20.8	47.8	42	37.9	7.5	5.8	3.9

(e) The Government of India accords high priority to the issue of hunger and malnutrition and is implementing several schemes/programs to improve food security situation in the country. Government allocates food grains at highly subsidized prices to States and Union Territories under National Food Security Act 2013 at present covers 800 million persons (75% population in rural areas and 50% population in urban areas). The coverage under the Act is substantially high to ensure that all the vulnerable and needy sections of society get its benefits.

Central Government is also implementing other welfare Schemes like Integrated Child Development Scheme (ICDS) which provides supplementary nutrition to children, pregnant women and lactating mothers, Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA), Annapurna Scheme for the senior citizens, Emergency Feeding Programs, Swachh Bharat Mission, Anemia Mukta Bharat, POSHAN Abhiyaan, Pradhan Mantri Matru Vandana Yojana, Intensified Home Based Newborn Care etc.

India's poor performance in Global Health Index

2191. SHRI SANJAY SINGH: Will the Minister of PLANNING be pleased to state:

(a) whether Government is aware that India ranked 102 out of 117 on the Global Hunger Index in 2019, which reported that around 90 per cent of children between the age of six and 23 months in the country do not even get the minimum food required;

(b) if so, the manner of which Government is planning to solve the 'distribution gaps' to combat this chronic situation; and

(c) Government's next immediate step as addressing hunger is a pressing concern?
