

**GOVERNMENT OF INDIA
MINISTRY OF HEALTH AND FAMILY WELFARE
DEPARTMENT OF HEALTH AND FAMILY WELFARE**

**RAJYA SABHA
UNSTARRED QUESTION NO. 282
TO BE ANSWERED ON 19th JULY, 2022**

CHCs AND PHCs IN THE COUNTRY

282 # SHRI NEERAJ DANGI:

Will the Minister of **HEALTH AND FAMILY WELFARE** be pleased to state:

- (a) the number of Community Health Centres (CHCs) and Primary Health Centres (PHCs) currently being proposed in the country, State-wise;
- (b) whether Government has reviewed the performance of such PHCs and CHCs;
- (c) if so, the details thereof and efforts that have been made to improve them; and
- (d) whether Government has taken notice of acute shortage of doctors in such Centres in the country, if so, the details thereof?

ANSWER

**THE MINISTER OF STATE IN THE MINISTRY OF HEALTH AND FAMILY
WELFARE
(DR. BHARATI PRAVIN PAWAR)**

(a): Rural Health Statistics (RHS) is an annual publication, based on Health care administrative data reported by States/UTs. As per RHS 2020-21, the number of Primary Health Centres (PHCs) in place in the country is 30,579 and number of Community Health Centres (CHCs) in the country, is 5,951. The State-wise number of PHCs and CHCs functioning in rural & urban areas is at **Annexure-I**.

(b) and (c): Under National Health Mission, Progress on the key deliverables is captured through the Health Management Information System (HMIS) and through quarterly financial and physical progress reports. Review meetings are held with states for monitoring of progress on the key deliverables for the year, besides regular monitoring visits from National Program Management Unit and Ministry officials.

Several other mechanisms such as, the Annual Common Review Missions (CRM); data from the external surveys such as Sample Registration Survey (SRS) and National Family Health Survey (NFHS) also provide information for course correction in implementation strategies. In addition, mechanisms of third-party monitoring of infrastructure related works is also envisaged, including geo-tagging of assets created under NHM.

At the District Level, the DISHA Committees, under the Chairmanship of Member of Parliament, monitor the progress of implementation of NHM. Rogi Kalyan Samitis (RKS) are set up at Public Health Facilities from Primary Health Centre (PHC) upwards, as an accountability measure to ensure high quality patient care. Village Health, Sanitation and Nutrition Committee (VHSNC) constituted with representation of the Panchayati Raj Institutions and Mahila Arogya Samitis for rural and urban areas, to facilitate an active

role for communities in action for addressing social and environmental determinants of health.

(d): Public health and hospitals is a State subject, the primary responsibility to ensure availability of human healthcare professionals - doctors in the public health facilities lies with the respective State/UT Governments. Under the National Health Mission (NHM), financial and technical support is provided to States/UTs to strengthen their health care systems including augmenting health human resource on contractual basis including support for in-sourcing or engagement of doctors, specialist doctors and other health professionals for provision of equitable, affordable healthcare based on requirements posed by the States in their Programme Implementation Plans (PIPs) and within their overall resource envelope.

Government has taken various steps to optimize the number of doctors and specialists in the country - such as increasing the number of seats in UG/PG level at various medical educational institutes/medical colleges across the country, an increase of more than 70 % in last 7 years; encouraging doctors to work in remote and difficult areas; encouraging States to adopt flexible norms for engaging specialists for public health facilities by various mechanisms like 'contracting in' and 'contracting out' of specialist services under National Health Mission. Further, NHM provides incentives and honorarium to staff for ensuring service delivery in rural and remote areas in the country.

States/UTs have been urged to fill-up the vacancies in sanctioned positions. As per Rural Health Statistics (RHS) – 2020-21, the State/UT wise status of availability of doctors and shortfall thereof in public health facilities both rural and urban areas is given at **Annexure II**.
