

GOVERNMENT OF INDIA
MINISTRY OF SCIENCE AND TECHNOLOGY
DEPARTMENT OF SCIENCE AND TECHNOLOGY
RAJYA SABHA
UNSTARRED QUESTION No. 1031
ANSWERED ON 13/02/2025

STATUS OF FUNDS ALLOCATED FOR R & D

1031 SHRI S. SELVAGANABATHY:

Will the Minister of SCIENCE AND TECHNOLOGY be pleased to state:

- (a) the details of the funds allocated for research and development and utilisation thereof so far, institution-wise;
- (b) the number of innovations recorded during the last five years, year and field-wise;
- (c) whether the research institutions in the country are unable to provide adequate facilities and competent faculty to train young brains to undertake innovations in the field of science and technology;
- (d) if so, the details thereof and the reasons therefor; and
- (e) the steps being taken/proposed to be taken by Government to scale up innovations in the field of science and technology in the country?

ANSWER

MINISTER OF STATE (INDEPENDENT CHARGE) FOR THE
MINISTRY OF SCIENCE AND TECHNOLOGY & EARTH SCIENCES
(DR. JITENDRA SINGH)

- (a) The details of fund allocated and utilized for research and development by institutions under Ministry of Science and Technology during last five years are at Annexure-I.
- (b) There are several innovations recorded during the last five years which is evident from number of patents filed. The details are given in Annexure-II.
- (c) No Sir. The research institutions in the country are capable to provide adequate research facilities including high-end and world class research infrastructure in some of the premier institutions and also competent faculties to train young brains to undertake research and innovations in the field of science and technology.
- (d) Does not arise.
- (e) The government has taken various steps to scale up innovation in the field of science and technology in the country. Recently, Anusandhan National Research Foundation (ANRF) has been established through an Act of Parliament: ANRF Act, 2023, to provide high-level strategic directions for research, innovation, and entrepreneurship in the fields of natural sciences, including mathematical sciences, engineering and technology, environmental and earth sciences, health and agriculture, and scientific and technological interfaces of humanities and social sciences. One of the focus of ANRF includes fostering collaborations among the industry, academia, government and research institutions, and create an interface mechanism for increased participation and contribution of industries and State governments in addition to the scientific and line ministries. Further, as per union budget 2024-25 Government has decided

to set up a mechanism for spurring private sector-driven research and innovation at commercial scale with a financing pool of ₹1 lakh crore and Rs. 20,000 Crore has been allocated for FY 2025-26 for research, development schemes. Under the NIDHI initiative, DST has launched various programs to provide resources in research and academic institutions for promoting innovations and to encourage young minds in academic and research institutes to convert their innovations into successful startups. DST has supported setting up of startups incubation centres in academic/research institutions with dedicated labs and prototyping centres to support innovators. These incubation centres have adequate support from faculties and professional teams to mentor and handhold the innovators and entrepreneurs.
